

Newly added claim 33 (as filed on June 21, 2002) is shown below in proper form (all words are underlined, as claim 33 is new relative to the claims in the Patent). Claim 33 has not been amended.

33. (Newly Added) A method of manufacturing an optical disk comprising  
the steps of:

forming a track of spiral shape on a substrate of the optical disk; and

forming a barcode pattern by a laser on the track.
